

**DOUBLE TREE®
HOTEL**

AT THE ENTRANCE TO UNIVERSAL ORLANDO

HIGH SPEED INTERNET & TELECOMMUNICATIONS INFORMATION

The Doubletree Hotel AT THE ENTRANCE TO UNIVERSAL ORLANDO offers up to date telecommunication and network infrastructure services. We can provide the necessary convention resources and experienced on-site staff that will enable your event to exceed standards.

The Doubletree's telecommunications services range from analog telephones to multi-line digital phones. Our digital package offers voice mail features, transfer capabilities, and conference calling features including specialty phones with conference speaker capability. We also offer state of the art wireless internet connections that can be used for a wide variety of functions such as basic internet connections, Voice over IP telephony, and VPN connections. We can utilize our internet functions to provide state of the art video conferencing and web casting between our hotel and your corporate offices or any other location that is accessible over the internet.

With the capability of multiple T-1 lines, we offer a wide range of network services that can be customized to your precise needs. Our bandwidth is scalable anywhere from 256 Kpbs to multiple T-1 lines, wired and wireless capabilities. This means that if you are on a budget or have a need for increased bandwidth, we can accommodate your needs.

We also offer a wide array of specialized networking services. Our team is ready to serve your needs with the flexibility to offer customers a wide range of network services such as custom wire configuration, network setup, wireless, and wired networking. Our bandwidth is over switched, managed networks that connect directly to our Internet provider. This means you will have low latency to any service that your network needs to reach. We have the availability to provide your company with private IP addressing that can be used in custom routing configurations to meet your technical staff's needs.

AT THE ENTRANCE TO UNIVERSAL ORLANDO

With any of our packages, you will receive 24/7 access to our team of specialized and qualified network engineers. Some of our most popular options are:

- On site DHCP to facilitate quick and painless IP address configuration, which makes setup of your networks a breeze.
- Available static IP address for custom applications and networking.
- Wireless internet is available in our guest rooms and meeting facilities, with complimentary wireless access in common areas.
- Specialized firewalls that will keep your corporate assets and equipment safe from both outside and inside intrusion.
- Wi-Fi protected access offering encrypted traffic across the “airline” between laptop and access point.
- Wi-Fi data verification process that verifies user identity through an industry standard authentication process.
- Data is encrypted using the latest in IP SEC, 3DES, and WPA, WPA2 wireless standards.
- Virtual Private Network tunneling to enable you to safely extend your intranet to your corporate conference on-site.
- Our VPN packages are certified by top companies such as Checkpoint, Cisco, Nortel, Watchgard, and Microsoft among others.
- Custom reporting options to show bandwidth response and utilization.
- On site convention services offering custom audio and video services including net conferencing and VOIP.
